

Pull Quote:

Whether it's walking side-by-side with our clients, or meeting face-to-face with prospective employees, we make people our business.

Main Heading:

Technology is only as good as the people behind it.

Body:

The success of any project depends on the quality of the team members, those individuals who lend their expertise, creativity and insights. However, building the right team can be challenging – especially in today's competitive, fast-paced environment.

That is where Hukari Technical Services, Inc. (HUKARI) can help.

HUKARI is a consulting firm specializing in engineering and technology support professionals. Our company is managed by engineers with widespread industry contacts and an in-depth knowledge of technology. HUKARI has been hired by clients ranging from the Department of Energy to private corporations such as, Fluor Hanford, CH2MHill, Kaiser-Hill LLC, BWXT-Pantex, BWXT-LANL, KSL-LANL, Washington Group International and Duke Engineering on projects across the country

Our areas of focus include:

- Aerospace
- Chemical engineering
- Civil engineering
- Electrical engineering
- Environmental and ecological engineering
- Facility start-up and operations
- Fire protection engineering
- Mechanical engineering
- Nuclear engineering
- Project management
- Quality assurance
- Safety Analysis and Licensing
- Senior management and mentoring
- System engineering
- Waste Packaging certification and shipping

Our Mission

We make it our mission to walk side-by-side with our clients to fully understand their needs and concerns. Using our industry experience and contacts, we find the highest-

caliber professionals to support our clients. We evaluate candidates, conduct background checks and acquire necessary licensing and clearances. We make certain that our professionals hit the ground running, exceeding client expectations from the very first day.

Our People

Our professionals are proactive and accustomed to working in a fast-paced environment. They hold degrees from top universities and advanced industry certifications with years of experience and a commitment to success.

But expertise is only part of the equation.

We search out professionals who will fit well into our client's situation. That's why we sit down with people face-to-face. We discover their ambitions and concerns; we evaluate their level of commitment and perseverance. These intangible factors determine the success of a relationship.

Success requires knowing how to motivate people. HUKARI is able to attract and retain the best people by offering above-average compensation and one of the most competitive benefits package in the industry. We have established an incentive structure that rewards performance, teamwork and professional development.

And yet, because of our lean organization structure, we provide our employees with top-level benefits while offering our clients competitive rates. Our clients get the best people at the best value.

Our Commitment

At HUKARI, we follow standards-based engineering principles that are compliant with regulations, and we apply cost-effective technologies. We stand by our word — 100% accountable in our agreements. What's more, we demand this same level of integrity from all people working for us. We understand that the trust of our clients, and the trust of the public, often rests on our professionals, and we take this trust seriously.

Trust, competitive rates, and quality personnel are reasons HUKARI was chosen for ongoing relationships with Prime Contractors to the Department of Energy (DOE). We provide key professionals in roles for hazard assessment, risk analysis, nuclear safety, systems engineering, project engineering, and project management.
